THEATRICAL PRODUCTIONS

This section will include examples of my theatrical experience in lighting design, projections and use of the lightboard. I believe that storytelling is emphasized through light where every lighting cue has the potential to evoke emotion, accentuate mood shifts in the audience.

Personal Style

My personal style includes blending creativity with my technical expertise. Not only will I go above and beyond to maintain and set up the lighting in the most appropriate way, I aim to do so in ways that are outside of the conventional means. This includes projections, bobbinet curtain, and other materials such as draping, sparks and fog.

Goals and Aspirations

My future goals include furthering my knowledge in theater tech beyond my current expertise. I am very interested in finding more creative ways to incorporate using projections in both theatrical performances as well as live events. I look forward to sharing my knowledge with others and aim to continue to build a welcoming theatrical community.
